

MMP100 | ANIMATION PROJECT STATEMENT

Title: Anger

Semester/Year: Spring 2020

Software: After Effects

Description : I decided to animate anger because I had some ideas that work well with anger. I chose red because red shows anger the most and black because with anger comes with sadness and darkness. I approached timing to make sure I used most transitions and they blend well with no mistakes. The challenging part was trying to use all transitions with a new animation because I didn't want to reuse any animation.
